GulfSea Cylcare XP 5040

Successfully completed both Ship Trial and Confirmation Trial

The product demonstrated outstanding piston cleanliness on two different engine models – MAN Mark 9.2 and Mark 9.5 – both running on VLSFO.

Underpinning this superior performance is an innovative dispersant technology that's combined with non-alkaline detergents, anti-oxidant and wear-protection chemistries.

With GulfSea Cylcare XP 5040, ship operators can end the inconvenient practice of switching between high- and low-BN cylinder oils. There will also be no switch required in ECAs.

CAT II 40BN cylinder oil is also recommended for:

- 1) LNG / LPG and a number of future low-carbon fuels endorsed for use by MAN ES
- 2) Dual-fuel engines

Piston crown:
minimal carbon deposit

Superior piston cleanliness

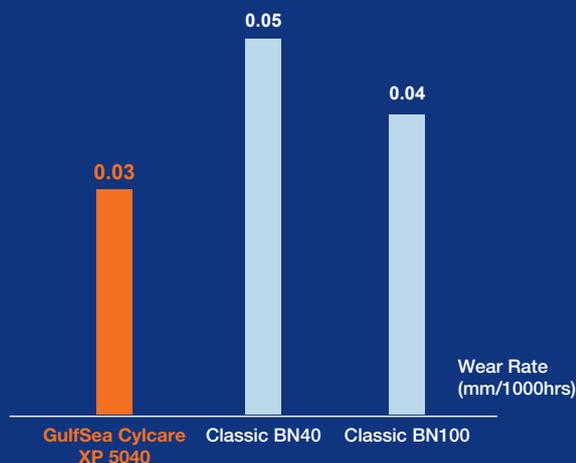

Available Now

As the first lubricant manufacturer to receive the NOL (obtained in August 2021), we have been the earliest supplier of CAT II BN40 cylinder oils to the marine industry.

GulfSea Cylcare XP 5040 is available in major ports.

Speak to your local Gulf Oil Marine representatives for more information.

Superior wear performance*

40% wear-rate improvement versus regular BN40 products*

Extend cylinder liner life

- reduce piston ring wear
- reduce ring breakage

* Based on our trial ships' data
